### DETAILED ACTION

1. Applicant's election with traverse of 10/13/04 is acknowledged. The traversal is on the ground(s) that:

- The invention(s) are not independent;
- There is no serious burden;

This is not found persuasive because:

- The examiner fails to grasp the significance of independence. More relevant, if issued, as is, they are patentable over each other.
- What constitutes an undue burden may be open to argument, but that there is an additional burden is clear. Each additional claim(s) to treat is an additional burden.

The requirement is still deemed proper and is therefore made FINAL.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 16-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over either Diessel et al. (5,837,200) or Olek et al. (6,214,556) or Edwards et al. (6,455,280).

Each of these references meet all the limitation(s) of the claim(s) but lack the intended uses, transplantation, genetic modification, etc.

With regard to Edwards et al. (6,455,280), see paragraph 31.

With regard to Olek et al. (6,214,556), see the abstract.

It would have been obvious to modify either Diessel et al. (5,837,200) or Olek et al. (6,214,556) or Edwards et al. (6,455,280) to provide/substitute these intended uses in order to increase system applicability.
